Operated by 836171 Ontario Inc.

A TRUSTED ENVIRONMENTAL, EMERGENCY SERVICE, AND DEMOLITION BUSINESS

Since 1989, REC has successfully completed over 9,000 environmental remediation and demolition projects throughout Ontario, specializing in the industrial, commercial, government, and institutional sectors. Our senior project management and site supervisory team has accumulated more than *one million hours of on-site environmental contracting experience* in the removal of all hazardous materials, including; asbestos, mould, lead, PCBs, plant decommissioning, site decontamination, soil remediation, and demolition.

REC is a full-service emergency response contractor committed to excellence in health and safety, and our record is impeccable. Our strength lies with our highly trained people, and we have over 100 unionized professionals on call to address your needs.

REC's reputation has been established by the quality of the services we provide and by relationships built on trust. This philosophy has become the cornerstone of our business. Each environmental and demolition project is unique, and we assemble a team of professionals that will bring the desired solutions to your project and exceed your expectations. We have the vision and the experience to deliver quality environmental and demolition services at a competitive price to meet your business needs.

REC provides remediation options tailor-made for your project from the start, whether they are emergency service calls, small maintenance calls, or multi-million dollar demolition and abatement projects. We believe that the process should be simple, so we do the work for you by creating options that offer sound environmental solutions.

Are you planning for an abatement, environmental, demolition, or restoration project? Are you ready for a disaster or emergency? Do you have your Emergency Response Contractor on call? We can assist. Contact us concerning your next project. REC services include the following:

- Environmental Abatement and Remediation Contractors
- Demolition; Deconstruction, Asset Recovery
- Hazardous Materials Removal; Asbestos, Mould, PCBs, Lead
- Industrial Plant Decommissioning/Cleaning of Heavy Metals
- Fire, Sewage Backup, Water, Wind Damage Restoration
- Emergency Response Service

REC is a turnkey, full-service, emergency response contractor. As a recognized leader in our industry, REC can provide up to \$10 million dollars 100% Performance Bond capacity, and \$5 million in environmental/pollution general liability insurance coverage for every project. REC has worked for a number of government agencies and other corporate clients where a high level of security or police clearance (CPIC) is required and REC is an approved NATO Department of National Defence Contractor.

Contact us today to arrange an appointment to discuss your upcoming project, or simply complete the questionnaire on the reverse and fax it back to us at (905) 888-0071. Be prepared for an Emergency – call us today and request an Emergency Service Contract and/or our Business Profile Reference Package. We look forward to working with you in the near future!

Sincerely,
Don Bremner, CEO, President

David Bremner, Senior Project Manager
